# Nikhil Soni

*Data Analyst*

Noida, India | +91 9984021458 | Nikhilsoni99qw@gmail.com | linkedin.com/in/nikhilsoni-pro | github.com/PromptEngineX

## SUMMARY

Data Analyst with a strong background in Mathematics & Statistics from Delhi University, specializing in SQL (PostgreSQL), Python (Pandas/NumPy), and statistical modeling. Proven track record of optimizing IT operations, streamlining reporting workflows, and evaluating code-based AI outputs. Adept at transforming complex datasets into actionable insights to improve business efficiency.

## PROFESSIONAL EXPERIENCE

**Data Analyst** 01/2025 - 07/2026 | Noida

*Tech Mahindra (Meesho IT Account)*

- Queried PostgreSQL/SQL databases to track and analyze IT ticket escalations, system performance metrics, and workflow efficiency.
- Developed Python scripts to clean and structure operational datasets, improving reporting accuracy across Meesho's IT operations.
- Evaluated and benchmarked code-based AI tools, running Python and SQL verification scripts to assess model precision and output logic.
- Managed cross-functional coordination between technical engineering teams and operational stakeholders to maintain strict SLA targets.

**Junior Associate** 04/2023 - 12/2024 | Noida

*Texas Review*

- Streamlined operational workflows and client onboarding processes, enhancing service delivery efficiency.
- Conducted statistical data analysis to track client conversion rates and operational bottlenecks, presenting key findings to senior management.
- Assisted in AI training projects, reviewing generated code and data annotations for accuracy using Python scripts.
- Automated Excel reporting and developed dynamic tracking sheets, minimizing manual documentation efforts.

## EDUCATION

**Bachelor of Arts: Mathematics** 06/2024 | New Delhi

*Delhi University*

Key Coursework: Probability & Statistics, Mathematical Modeling, Linear Algebra, Real Analysis, Operations Research

## PROJECTS

**Jewellery Rate Tracker**
- Built a Python and PostgreSQL backend system to ingest, parse, and calculate live market prices for precious metals.

**Creator Marketplace Platform**
- Designed relational database schemas and user data models using Node.js and PostgreSQL.

**Elixir AI Assistant**
- Developed custom prompt parsing workflows and task-automation logic for personal productivity.

## TRAINING

**Data Analytics & AI Self-Study**

Completed coursework in Google Data Analytics (Coursera), Computer Concepts (NIELIT CCC), and AI Fundamentals (NVIDIA DLI).

## SKILLS

- SQL (PostgreSQL) — Expert
- Interpretation — Expert
- Python (Pandas, NumPy) — Expert
- Visualization & Reporting — Expert
- Data Cleaning & Validation
- Advanced Excel — Expert
- Statistical Modeling
- Machine Learning Analysis — Expert
